

Restore4Life webinar offers a glimpse into the February 2024 Call for Associated Regions

We are pleased to announce that the [Call for Associated Regions](#) to participate in the Restore4Life project will **launch in February 2024**. During the Call, we will be looking for at least **5 Associated Regions** that we can provide with technical assistance to use the outcomes and knowledge of Restore4Life to prepare roadmaps, plans, and projects to restore wetland ecosystems in their region.

Each associated region can apply for a **grant up to € 100,000** to create new opportunities and collaborations that will shape the future.

The Call for Associated Regions is specifically designed to engage and collaborate with **Local and Regional Authorities**.

To provide valuable insights and a comprehensive understanding of what this call entails, we invite you to join our experts for an [Info Webinar on 15 December 2023](#).

During the event, participants will have the opportunity to:

- ◆ Learn more about the core objectives of the call;
- ◆ Understand the eligibility criteria;
- ◆ Get a detailed understanding of the funding and activities;
- ◆ Get all their questions answered.

About the project:

Restore4Life, a Horizon Europe funded project, will address the crises in the European wetland sphere through the development of a “**Restore4Life Wetland Restoration Decision Support System**” at the Danube Basin level. The service will be based on a shared vision for wetland restoration, including co-creation and co-development of tools that will allow local stakeholders and actors to be actively involved in restoration works and will help local businesses to adopt new activities through nature-based solutions supported by new generation of data analysis tools.

Throughout the duration of the project, we aim to achieve the following goals:

Develop a Restore4Life
Wetland Restoration
Decision Support
System

Empower the
community

Support local revenue &
business activities in
restored ecosystems

Support the
implementation
of holistic wetland
restoration solutions

The project will run for 48 months and is led by the University of Bucharest. The consortium consists of a total of 31 organizations including 5 local and national authorities, 21 academic and research institutions, 3 NGOs and 2 SMEs.
