

## THCS Shared Learning Webinar (WP10)

Save the Date  
27 May 2025  
11.00 - 12.00 CET

### *“Modernising Hospitals for a Sustainable Future”*

Hospitals are among the most energy-intensive buildings. With growing environmental concerns and aging infrastructure, modernising healthcare facilities has never been more critical. This THCS shared learning webinar, organized by WP10, **will explore how energy efficiency can drive sustainability, cost savings, and better patient environments. It will address the challenges faced by aging hospital infrastructure, including the environmental and economic pressures related to the impact of hospital operations on energy consumption.**

This webinar will be the opportunity to discuss how this challenge is addressed in the hospital settings in the Czech Republic and Scotland. It will specifically outline the **key areas of energy use in hospitals, common inefficiencies in existing systems and benefits of energy-efficient upgrades.**

The webinar will also be an opportunity to learn more about supportive **regulations, grants, and financing options that make energy-efficient upgrades effectively in the Czech Republic and Scotland.**
