

INTRODUCTION TO YOUNG INNOVATORS

Help today's youth become
tomorrow's Climate Leaders!

A profoundly transformative educational programme that empowers your 12-18 year old students to understand today's climate emergency while generating ideas for tomorrow's sustainable future.

If you are reading this you are probably a teacher, or a different kind of educator, and:

- You are worried about the need for sustainability and the detrimental consequences of climate change
- You see opportunities for change and are curious for rethinking the current ways of living
- You believe in the power of education and feel excited to make positive impact through working with young people

Would you check all these circles? Then you are ready for the Young Innovators programme

[Partners to enter their contact details]

YOUR PROGRAMME IN A NUTSHELL

1. **A (local) challenge is introduced into your classroom**
2. **You help your students explore the challenge**
3. **You guide them in identifying opportunities for change**
4. **Students come up with solutions and share these with the world**

THE RESULTS

- » **Shift mindsets**
You provide students with new mental models that activate their vision, creativity and emotional agility to better understand reality.
- » **Foster leadership**
We unlock the ability of young people to accept uncertainty and manage complexity - two defining qualities of wise leaders.
- » **Connect and thrive**
We help students become aware of the need for a collective effort. They experience 'the power of many' by doing teamwork, collaborating and engaging with a larger community, including real industry and government representatives.

THE YOUNG INNOVATORS COMMUNITY

- » **Supporting you:** We provide you with a complete set of resources to understand, engage and launch the programme in your school.
- » **Supporting each other:** You will be part of a global community to connect with like-minded peers, share learnings and much more!

YOUR ROLE

You will guide your students through a real-world climate challenge, coaching them to unleash their creativity and come up with innovative solutions.

To help you engage your students with this learning journey, while saving you from spending too much time on preparing, we will provide you with the knowledge and all resources needed!
